Aditya Raj

Patna, Bihar, India
adityaraj.14725832@gmail.com — LinkedIn

Professional Summary

Data Science and Applications student at IIT Madras with interdisciplinary background in Biotechnology. Strong foundation in statistics, backend development, and algorithmic problem-solving. Experienced in building full-stack applications using Flask and Vue.js. Interested in scalable systems, backend engineering, and data-driven decision making.

Education

Indian Institute of Technology, Madras — BS in Data Science and Applications
Relevant Coursework: Statistics, Machine Learning Foundations, Data Structures, Algorithms, Database Systems

Patna University — B.Sc. Biotechnology
Core Areas: Molecular Biology, Biostatistics, Analytical Techniques

Ishan International Public School — High School (PCB)

Technical Skills

Programming: Python, JavaScript
Web Development: Flask, Vue.js, HTML5, CSS3
Databases: SQLite, SQL
Core Concepts: Data Structures, Algorithms, REST APIs, OOP, Statistical Analysis
Tools & Environment: Git, Linux, VS Code

Projects

EcoFinds – Used Goods Marketplace (Full Stack)

- Designed and developed a full-stack marketplace platform enabling users to list, browse, and purchase used goods.
- Built RESTful backend using Flask with authentication, CRUD operations, and session management.
- Developed responsive frontend using Vue.js with dynamic rendering and component-based architecture.
- Integrated database for persistent product storage and user data management.

Placement Portal – Student Dashboard System

- Developed a role-based student dashboard using Flask and Jinja template inheritance.
- Implemented dynamic routing, backend logic integration, and database connectivity.
- Designed modular UI components to improve maintainability and scalability.

Leadership & Activities

- Member, Sponsorship Team – Contributed to outreach strategy and external communications for college fest.
- Regular practice of Data Structures and Algorithms for problem-solving proficiency.

Interests

Backend Engineering, System Design, Competitive Programming, Data Science Applications
